

I don't understand how the FCC can waste valuable time and effort and money on this nonsense petition (NAB 04-160). I mean who does this hurt? I love the freedom of choice that my satellite radio provides and now I can enjoy the benefits of local traffic and weather exactly when I want it. I stopped listening to the garbage on AM and FM a long time ago. This is a complete waste of your time. Squash this proposal and get back to work. Terrible use of your time if you ask me.

Thanks

Viktor
